– so you get results!

LASER HAIR REMOVAL

The lasers we use are genuine Lasers, not an IPL machines. Since lasers deliver light at one specific wavelength, the energy used is much more precise, more powerful and effective in damaging the hair follicle. We specialise in the treatment of both men and women. A treatment is needed every 4-6 weeks. A series of treatments is needed to achieve the desired result. Our lasers are less painful, quicker and the safest in the industry.

Laser Hair Pricing

We let you choose!

\$70 per 5 min (Time will depend on surface area to be covered eg. Underarm & Bikini) OR Set area pricing (pay as you go, eg. Ladies lower legs \$199)
Discounted area pricing (packages available)

LASER PIGMENTATION REMOVAL

Do you have age spots, sun spots, freckles or other pigmentation? Try our dynamic laser hyperpigmentation removal treatments and take years off your skin!

Using our state of the art laser, we are able to remove hyperpigmentation and promote skin tightening from all areas of the face and body. The procedures are safe and extremely effective. A before and aftercare program is provided for you to obtain the optimum results from your treatment. Anywhere from 1-4 treatments are needed.

Laser Pigmentation Pricing

Individual pulse	\$40	Decolletage	\$250
Face	\$220	Hands	\$180
Neck	\$110	Shoulders	\$230

Discounts on combined areas available.

MEDICAL GRADE FACIALS TREATMENTS

Whether you suffer from acne, rosacea, wrinkles, skin pigmentation or other skin conditions, **Laser by Sia** can assist in not only treating but correcting and controlling these conditions.

Our Mediderm Visage and Medifacials are customised treatment plans that consists of a combination of medical grade procedures, equipment and products that allow us to individualise each of your treatments to suit your skin in its present condition.

Using a variety of ultrasonic wavelengths, photo light therapy, chiral peels infusions and medical grade skincare products, we are able to remove dead skin and extract impurities. There is no irritation or inflammation, so its ideal for sensitive skins. This means no painful squeezing, scrubbing, abrasive crystals or suction. The treatment regenerates collagen and elastin, which leads to a more youthful complexion. Forget cosmetic surgery and start on a program with our experienced clinicians.

Medical Grade Facial Pricing

Medifacial (30 min)
\$160 per treatment
Package x 3 \$390
Package x 6 \$750

Mediderm Visage (75min)
\$240 per treatment
Package x 3 \$630

BOTOX AND FILLERS

At **Laser by Sia** we have highly certified physicians with years of experience performing all our Botox and filler procedures. Botox diminishes and softens the appearance of dynamic wrinkles as it temporarily relaxes the underlying muscles that are causing the wrinkle, while fillers can lift and add volume to the areas being treated, erasing signs of static wrinkles, deep folds in the face as well as lip enhancements and re-shaping of facial contours. In a very natural way, Botox and fillers through a simple injection will correct minor imperfections and soften the signs of ageing easily. Lasting typically six to nine months, depending upon skin type, health condition, and other varying factors.

laser *by* Sia, we have experience
– so you get results!

Sometimes more or less is needed, depending upon skin type, area treated, volume injected into the specific area, and the technique used for the procedure.

Book in for a consultation with one of our highly qualified physicians to discuss further details regarding these procedures and see which would be best suited for your concerns.

BIO LIGHT THERAPY

BIO Light has biostimulative effects: when applied to the skin it stimulates light-sensitive intracellular structures and molecules. This initiates cellular chain reactions and triggers so-called secondary responses.

BIO Light Therapy stimulates and modulates reparative and regenerative processes. BIO Light Therapy acts in a natural way by supporting the regenerative capacity of the skin, muscle and joints and therefore helps the body to release its own auto immune responses. We are able to treat acute conditions such as; acne, rosacea, eczema, psoriasis, arthritis and many other skin conditions.

One may need several treatments depending on the severity and age of the condition.

Bio Light Therapy Pricing

1 x treatment \$90 Package of 3 \$210

COSMETIC TEETH WHITENING

Over time, our lifestyle contributes to the aging yellow and grey staining to our teeth. Coffee, red wine, chocolate and even certain medications are the main cause of tooth discolouration. Using the latest Blue LED Cosmetic Lamp and a unique photopixilated mouth guard, we can lighten all your teeth both at the top and at the bottom, for all over teeth whitening using much less hydrogen peroxide without sensitivity.

We recommend our Cosmetic Bright pen for home maintenance. So if you are in need of a smile makeover, contact us now!

Cosmetic Teeth Whitening Pricing

Cosmetic teeth whitening treatment	\$560
Touch up treatment	\$140
Cosmetic bright Pen	\$49

MEDICAL GRADE SKINCARE RANGE

Our skincare products have been chirally corrected with the highest concentration and potency of organic active ingredients. They contain no parabens or harsh preservatives. We use only the most advanced “clinically proven” active ingredients that penetrate the skin to dermal level. Most skincare products only sit on the skin promising “false hope” or a “temporary fix”. Our products are designed to build, strengthen and correct your skin so it doesn’t just appear to be good, but actually is healthy, refined and retexturised. A youthful image is achievable with a little time and dedication. Your skin deserves this much.

CLINICAL CHIRAL SKIN PEELS

“Cheat your way to perfect looking skin really fast”...we have superb clinical strength peels for all skin types and conditions to fulfill your desire for clear, glowing, youthful skin. The organic and chirally corrected ingredients of our peels cause less irritation to the skin than other skin peels. Some downtime is needed, but the peels are dynamic and the results are remarkable!

CELLULITE REDUCTION, WRINKLE REDUCTION & SKIN TIGHTENING

Experience Painless Treatment

Laser By Sia’s Cellulite and skin tightening treatment promotes natural skin healing without injuring delicate tissue. No other device is capable of offering measurable results with a relaxing massage-like experience.

Experience Medical Grade Technology

(MP)² harnesses the power of Magnetic Pulses Technology, which is clinically proven to improve dermal micro-circulation and growth of new collagen.

laser *by* Sia

Experience Safety

Laser By Sia's Cellulite and skin tightening treatment delivers a risk free treatment that does not harm the epidermis. (MP)² combines 8 energy waves into a single matrix to effectively reduce temperature peaks. It is so safe that there is no need for cooling gels or sprays.

BEFORE

AFTER 7 TREATMENTS

Cellulite reduction

The term cellulite describes fat deposited in pockets close to the skin surface, commonly focused around the thighs, buttocks and hips. Cellulite is influenced by many factors such as aging and poor blood circulation, contributing to the weakening of collagen fiber and causing the orange peel-like appearance of skin surface.

(MP)² generates a magnetic field that induces the release of growth factors required for the proliferation of dermal fibroblast, as well as for the sprouting of new blood vessels. The RF component of (MP)² increases collagen and elastin synthesis through controlled thermal damage mechanism, and triggers enzyme mediated lipolysis. These effects lead to decreased subcutaneous fat mass, improved blood circulation and stabilization of collagen strands, resulting in cellulite reduction.

Wrinkle reduction

Wrinkles are usually associated with aging, which brings about multiple biological changes in the dermis and epidermis. Increased collagen fragmentation, decline in the number of dermal fibroblasts that produce collagen, and reduced dermal circulation lessen the skin's elasticity and cause the formation of wrinkles.

A potent treatment will promote the production of collagen and elastic fibers and improve blood flow, and thus restore elasticity and revitalize the skin.

laser *by* Sia, we have experience
– so you get results!

The magnetic pulse component of (MP)² induces the release of growth factors required for the sprouting of new blood vessels, as well as for proliferation of dermal fibroblast. Concurrently, the RF component induces collagen and elastin synthesis by creating controlled damage and triggering the skin's healing process. The result is a more vital, toned and healthy looking skin with improved elasticity and texture.

BEFORE

AFTER 4 TREATMENTS

Skin tightening

The flow of time and long-term exposure to ultraviolet radiation from sunlight causes skin to age – a process called photo aging. Lax and saggy skin with loss of elasticity is one of the most visible signs of photo aging. Several biological processes play a role in causing skin laxity: increased collagen fragmentation; decrease in the number of fibroblasts and progressive reduction in the number of capillary loops, resulting in a diminished nutrient supply to the skin.

An effective aesthetic intervention will reverse and correct these processes, leading to healthier, more flexible and attractive skin.

The magnetic pulse component of (MP)² induces the release of growth factors required for the sprouting of new blood vessels, as well as for proliferation of dermal fibroblast. Simultaneously, the RF component induces collagen and elastin synthesis by causing controlled thermal damage in the dermis, which triggers the self-repair mechanism of skin tissue. The result is a marked improvement in skin tightness and elasticity, and in overall skin condition.
